o/s - This symbol indicates that Australian supply may be supplemented by supplies from New Zealand and other countries.
 C - This symbol indicates that product has been kept in 'controlled atmosphere' conditions.
 A note on seasonal charts: Harvest seasons don't quite run like clockwork. Changes in weather each year, for instance, can alter harvest dates. Farmers are also constantly striving to extend the harvest season on each end with new growing techniques and crop varieties. But these charts should give you a pretty good idea of the prime harvest season for most varieties.
